The NAB seriously needs to find another agenda if it's to the point of trying to ban instant traffic and weather provided to subscribers of XM Radio. Petition 04-160 needs to be dissolved, and as a paying subscriber of XM Radio, I'd like to thank XM Radio for the quick, accurate, and reliable services they are providing. I can not really say I miss all of the commercials and worthless programming that comes from all of the local FM channels that are available elsewhere. I would have to eliminate FM all together if petition 04-160 were to actually pass. Once again, I guess it would have to come down to whether we can and are willing to abide by the rather important document known as the Constitution of The United States of America, or if it is just there and should just be taken for granted. After all, if we are going to take the very first amendment in to question, why stop there? Obviously everyone involved in the creation of petition 04-160 couldn't honestly care about rights that anyone as an avid XM listener has in the first place, which brings me to my final statement: Drop 04-160. We all know deep down how ridiculous a petition like this even is. Maybe the NAB should find an actual dilemma to discuss and leave XM alone. I guess innovation and technology is their enemy going by past events, so to them I must say, "good luck with the future".
